RG104 E-1 Box 191

Treasury Department,

Bureau of the Mint,

Washington, D. November 21, 1895.

Superintendent, U. S. Mint,

Philadelphia, Pa.,

Sir:-

I have received your letter of the 20th instant, enclosing statement of profits on medals and proof coins respectively, sold during the fiscal year 1895, and find that the same differs from the statement of earnings and expenditures of your Mint for the year, by $28.33.

According to the statement of earnings and expenditures for the quarter ended December 31st, 1894, the profits on proof coins and medals sold was $463.27, while the statement now forwarded gives it as $462.97---a difference of thirty cents; in your medal account for the month of June an item of $28.03 appears as gain on silver, making the total differences as above stated, $28.33.

I will thank you to inform me what portion of this sum should be treated as profits on medals and what if any, as profits on proof coins sold.

Respectfully yours,

R. E. Preston

Director of the Mint
